Overview

Thank you for purchasing a Matrox ATC (Air Traffic Control) graphics card. Your Matrox product is a high-performance graphics card that plugs into an expansion slot inside your personal computer. This card supports DualHead features, digital and analog monitors, and display resolutions up to 2048 × 2048 (analog or digital) or 2560 × 1600 (dual-link) for your main monitor and up to 1920 × 1200 for a secondary analog monitor.

Hardware supplied

![Matrox card](PCI shown)

1 BNC cable *

(DVI to 5× BNC)

![DVI-to-HD15 adapter *](Provided with certain Matrox product.)

Software supplied (for Windows 2000/XP)

- Matrox PowerDesk-SE – to use your Matrox graphics hardware
- Other software – see the CD-ROM Readme file

Installation overview

Note: If your Matrox product is already partially or fully installed on your computer, some or all the installation information in this guide may not apply to you. However, this information may be useful if you need to reinstall your Matrox product.

To install your Matrox product:

1. Install the Matrox card – see “Hardware installation”, page 3.
3. Install the software – see “Software setup”, page 9.
Hardware installation

This section describes how to install your Matrox card. For information specific to your computer, like how to remove its cover, see your system manual.

**WARNING:** To avoid personal injury, turn off your computer, unplug it, and then wait for it to cool before you touch any of its internal parts. Also, static electricity can severely damage electronic parts. Before touching any electronic parts, drain static electricity from your body (for example, by touching the metal frame of your computer). When handling a card, carefully hold it by its edges and avoid touching its circuitry.

1. **Open your computer and remove your existing graphics card**

   If a graphics card isn’t already installed in your computer, skip to step 2.

   a. Using Add/Remove program from the Windows Control Panel, remove any currently installed display drivers. Restart your computer for the changes to take effect.

   After your computer restarts, you’re prompted to install drivers for the new graphics hardware detected. Click Cancel.

   b. Turn off your computer and all peripherals such as your monitor or printer.

   c. Open the computer and remove your existing graphics card. (If graphics hardware is built into the motherboard of your computer, this graphics hardware should automatically disable itself after your Matrox card is installed. For more information, see your system manual.)

---

*With multi-display mode, you may be able to use your existing graphics card. For Windows 2000/XP, see Windows 2000/XP online help under “Install additional monitors”.*
2 Choose a PCI slot

Most computers have different types of expansion slots. Choose a PCI or PCI Express \(\times 16\) (PCIe) slot, depending on the type of Matrox card you have. Your system manual should identify the location of each type of expansion slot in your computer.

Note: If you’re using a PCI graphics card in a PCI 64-bit compatible slot, your choice of PCI slot may affect your card or system performance. For more information, see your computer manual.

WARNING: Inserting your Matrox card into the wrong type of slot could damage your card, your computer, or both.

If you’re using a 32-bit PCI slot, only part of your card’s edge connector should be inserted into the PCI slot (the part closest to the back of the computer).

3 Insert your Matrox card

a Position your Matrox card over the expansion slot you’ve chosen.

b Push the card in firmly and evenly until it’s fully seated in the slot.

c Secure the bracket of your Matrox card to the computer frame.
Your Matrox card is now installed. *Before restarting your computer*, connect your monitor or monitors (see “Connection setup”, page 6). *After connecting*, restart your computer and install your Matrox software (see “Software setup”, page 9).

⚠️ **WARNING:** If your computer doesn’t restart after your graphics card is installed, turn off your computer to avoid damaging electronic parts. For troubleshooting information, see page 10.
Connection setup

This section describes how to connect your monitors to your Matrox graphics card. Your connection setup depends on the connection type your main monitor supports.

**WARNING:** Don't change monitor connections while your computer is turned on. While your computer is turned on, it may be using monitor settings that are specific to the current monitor connections. Some devices may be permanently damaged if incorrect settings are used.

**Note:** To connect a digital monitor (a monitor that uses digital input, usually a flat panel monitor) to your Matrox product, your monitor must have a DVI connector.

Some monitors with DVI connectors support both digital and analog input. If you're using one of these monitors with your Matrox product, make sure it's configured to use the correct type of input. For more information, see your monitor documentation.

**For a main analog monitor**

If your main monitor uses 50 ohms analog input though BNC (Bayonet Neil-Concelman) connectors (such as Sony DDM, NTT-AT SI-DL4M, Barco ISIS, and similar monitors), you need to use a BNC cable.

**WARNING:** If an unsupported monitor is used with your Matrox product, this monitor may be permanently damaged. If you're using the BNC cable to connect an analog monitor to the main connector (A) of your graphics card, this monitor must have RGB connectors that support 50 ohms and sync connectors that support 75 ohms. For more information, see your monitor documentation.
1 Connect your main monitor

Connect your BNC cable to the main connector (A) of your Matrox card.

Connect the BNC connectors on your BNC cable to your analog monitor.

Note: When connecting the BNC connectors on your BNC cable to your monitor, make sure the Red (R), Green (G), Blue (B), Horizontal Sync (H – gray wire), and Vertical Sync (V – black wire) connections are firmly in place and plugged into the correct input.

2 Connect your secondary analog monitor (optional)

Connect your analog computer monitor to the secondary connector (B) of your Matrox graphics card.

If your monitor cable has a DVI connector, connect it directly to the secondary connector of your Matrox graphics card.

Note: To use a monitor with a DVI connector as your secondary monitor, make sure it supports analog input. For more information, see your monitor documentation.

If your monitor cable has an HD-15 connector, use the DVI-to-HD15 adapter included with your Matrox product to connect your monitor to the secondary connector.

Make sure the connectors are firmly in place. Your Matrox card is now installed. Restart your computer and install your Matrox software (see "Software setup", page 9).
For a main digital monitor

If your main monitor uses digital input through a single-link DVI connector (such as Barco digital ISIS and similar monitors) or a dual-link DVI connector (such as 30-inch Apple Cinema HD Display monitors), you can use a standard DVI cable. This cable should be provided with your monitor.

1. Connect your main monitor
   Connect your main monitor directly to the main connector (A) of your Matrox graphics card.

2. Connect your secondary analog monitor (optional)
   Connect your analog computer monitor to the secondary connector (B) of your Matrox graphics card.

   If your monitor cable has a DVI connector, connect it directly to the secondary connector of your Matrox graphics card.

   **Note:** To use a monitor with a DVI connector as your secondary monitor, make sure it supports analog input. For more information, see your monitor documentation.

   If your monitor cable has an HD-15 connector, use the DVI-to-HD15 adapter included with your Matrox product to connect your monitor to the secondary connector.

   Make sure the connectors are firmly in place. Your Matrox card is now installed. Restart your computer and install your Matrox software (see “Software setup”, page 9).
Software setup

This section describes how to install Matrox software for Windows 2000/XP.

You may need administrator rights to install certain software. For more information, see Windows documentation.

1 Download your Matrox software package

Contact your Matrox representative to obtain the latest driver and software package for your product.

2 Install display driver

Windows detects new hardware when you restart. If Matrox display drivers haven’t been previously installed, Windows prompts you to install a display driver. Click Cancel, then run the software package you downloaded. Follow the on-screen instructions.

3 Configure your monitor settings

To take full advantage of your graphics card, make sure you have the correct monitor settings selected in Windows for each of your monitors:

a Right-click your Windows desktop background, then click Properties → Settings → Advanced → Monitor. If you’re using a multi-display desktop, select a display before clicking Advanced.

b If “Hide modes that this monitor cannot display” is available, make sure it’s enabled. Under Screen refresh rate, select the highest refresh rate listed.

c Click OK → OK.

For more information on Windows monitor settings, see Windows documentation.

WARNING: If incorrect software monitor settings are applied, some monitors can be permanently damaged. For more information, see your monitor manual.

4 Set up your display software

Use Matrox PowerDesk software to change certain display settings or access Matrox features. To access PowerDesk, double-click its icon ( ) on your Windows taskbar. To see the PowerDesk icon in Windows XP, you may need to click the Show hidden icons button ( ) on your Windows taskbar. For more information on how to use Matrox PowerDesk, see the online help.
Troubleshooting

Basic procedures

This section explains basic procedures that are referred to by some troubleshooting items in this guide.

Restarting in VGA mode

Windows 2000/XP – What follows is information on how to restart your computer in VGA mode.

1. Click Start → Shut Down → Restart → OK to restart your computer. If your primary monitor is unusable, see your system manual for information on how to restart your computer using a hardware control.

3. Select “VGA mode”, then press [Enter].

Main troubleshooting

This section addresses possible problems that could prevent you from using your computer.

Problem Computer doesn’t display information or boot after Matrox card is installed

<table>
<thead>
<tr>
<th>Cause</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>Your Matrox card may not be properly installed.</td>
<td>Make sure your Matrox card is properly installed. Specifically, make sure the card is firmly inserted in its expansion slot and that all connections to it are firmly in place. For more information, see “Hardware installation”, page 3.</td>
</tr>
<tr>
<td>There may be unsupported graphics hardware in your computer.</td>
<td>If an unsupported graphics card is plugged into an expansion slot, remove it.</td>
</tr>
<tr>
<td>If graphics hardware is built into your computer motherboard, your system may not have automatically disabled it when you inserted your Matrox card. Check your system manual for instructions on how to disable your computer’s built-in graphics hardware.</td>
<td></td>
</tr>
<tr>
<td>Your computer BIOS (Basic Input/Output System) settings may be incorrect.</td>
<td></td>
</tr>
</tbody>
</table>
1Solution
Change your BIOS settings. For more information on your computer BIOS, see your system manual.

Cause
Your computer BIOS may not be up to date. For more information on your computer BIOS, see your system manual.

Solution
Reinstall your previous graphics card and, if possible, update your computer BIOS. This can usually be done with software from the manufacturer of your computer. Contact your system vendor or manufacturer to get a BIOS update for your computer.

To get the correct BIOS update, you may need to know the serial number your computer displays when it restarts. (This number is usually in the lower-left corner of the display.)

Problem Wrong color balance, screen image off-center, or no picture at all

Cause
Your monitor video controls may be improperly set.

Solution
Adjust your monitor controls (brightness, contrast, and so on). For more information, see your monitor manual.

Cause
Your monitor may not be properly connected.

Solution
Make sure you’re using the correct connectors (see “Connection setup”, page 6) and that all connectors are properly fastened.

Solution
Make sure the monitor power cable is firmly in place.

Solution
Make sure the connection to the back of the monitor is firmly in place.

If your monitor uses BNC input, make sure the Red (R), Green (G), Blue (B), Horizontal Sync (HSYNC – white or gray wire), and Vertical Sync (VSYNC – black wire) connections are firmly in place and plugged into the correct input.

Cause
If your monitor uses BNC input, one or more connection settings may be incorrect.

Solution
If your monitor is connected to the main connector (labeled A) of your graphics card, set your monitor RGB inputs to 50 ohms and your sync switches (if available) to 75 ohms, with the sync set to "external". If your monitor is connected to the secondary connector (B) of your graphics card, set your monitor RGB inputs and sync switches (if available) to 75 ohms, with the sync set to "external". These controls are usually switches on the back of your monitor.
Cause If display problems occur after the startup screen of your operating system, your software monitor settings may be incorrect.

Solution Make sure correct software monitor settings are selected.

If your primary display is still usable, see “Configure your monitor settings”, page 9. Otherwise, see the next troubleshooting item.

Problem After the startup screen, or after display settings are changed, the screen image is garbled or unusable (blank screen, rolling or overlapping screen images)

Cause The Matrox display driver may be trying to use settings your monitor doesn’t support. This can happen if a monitor was never selected in the software and the display resolution was changed to one your monitor doesn’t support, or if the monitor connected to your computer was changed without changing it in the software.

WARNING: If incorrect software monitor settings are applied, some monitors can be permanently damaged. For more information, see your monitor manual.

Solution Windows 2000/XP –

1 If your primary display is unusable, restart your computer in VGA mode (see "Restarting in VGA mode", page 10).

2 Right-click your Windows desktop background, then click Properties → Settings.

3 Move the Screen area (Windows 2000) or Screen resolution (Windows XP) slider down to its lowest setting, then click OK.

4 Restart your computer normally.

5 Make sure the correct monitor is selected in Windows (see "Configure your monitor settings", page 9).

6 Restore your original display settings (see steps 2 and 3).

Cause Files on your system may have been deleted or corrupted.

Solution Uninstall, then reinstall Matrox software:

Note: Before uninstalling software, make sure you have all the necessary files to reinstall software that may still be needed.
If your primary display is unusable, restart your computer in VGA mode (see “Restarting in VGA mode”, page 10).

To remove Matrox software:

a Click **Start** → **Settings** → **Control Panel** → **Add/Remove Programs** (double-click*) → **Matrox PowerDesk-HF and Driver** → **Change/Remove** → **Yes**. (* Depending on your version and configuration of Windows, this part of the step may not be necessary.)

b Click **No** if you’re asked to restart your computer.

c Click **Matrox PowerDesk-SE** → **Change/Remove** → **Yes**.

Restart your computer for the changes to take effect.

After your computer has restarted, install the latest display driver for your Matrox graphics card. You may also need to reinstall other Matrox software.

Note: Windows 2000/XP – You may need administrator rights to remove certain software. For more information, see Windows documentation.

Note: Windows 2000/XP –

1 If your primary display is unusable, restart your computer in VGA mode (see “Restarting in VGA mode”, page 10).

2 To remove Matrox software:

   a Click **Start** → **Settings** → **Control Panel** → **Add/Remove Programs** (double-click*) → **Matrox PowerDesk-HF and Driver** → **Change/Remove** → **Yes**. (* Depending on your version and configuration of Windows, this part of the step may not be necessary.)

   b Click **No** if you’re asked to restart your computer.

   c Click **Matrox PowerDesk-SE** → **Change/Remove** → **Yes**.

3 Restart your computer for the changes to take effect.

4 After your computer has restarted, install the latest display driver for your Matrox graphics card. You may also need to reinstall other Matrox software.

Note: Be sure to check for any last-minute release notes at the end of this manual and in the Matrox CD-ROM **Readme** file. Also, check the Matrox Web site (www.matrox.com/mga) for the latest Matrox software, technical support, and product information.
Extra troubleshooting

Graphics

The following troubleshooting items address problems related to graphics hardware.

Problem | Can't use Windows, Windows reports a configuration error, and/or can't install or uninstall Matrox display driver

| Cause | The problem may be specific to the motherboard in your computer.
| Solution | There may be a software update available for your motherboard. To find out what motherboard model your computer is using, see your system manual. For more information, contact the maker of your motherboard or computer. Many motherboard or computer manufacturers have software updates available on their Web site.

| Cause | Files on your system may have been deleted or corrupted.
| Solution | Remove, then restore Matrox software. For more information, see page 12.

Problem | Monitor settings aren't automatically detected

| WARNING | If incorrect software monitor settings are used, your display may become unusable and some monitors can be permanently damaged. For more information, see your monitor manual.

| Note | Settings for your analog grayscale monitor are preconfigured in the display driver. If an unsupported monitor is used with your Matrox product, it may be permanently damaged. A list of supported analog grayscale monitors is available on the Matrox Web site (www.matrox.com/mga).
Cause
Your monitor may not be Plug-and-Play. Most new monitors are Plug-and-Play but many older ones aren't. Software can't automatically detect settings for monitors that aren't Plug-and-Play.

Solution
Manually select your monitor settings in the software. For more information, see "Configure your monitor settings", page 9.

Cause
If a monitor was changed or added while Windows was running, the new monitor may not be detected by the software.

Solution
Restart your computer. If your monitor is a Plug-and-Play monitor, it should be automatically detected by the software.

Cause
You may be using BNC connectors with a Plug-and-Play monitor. The Plug-and-Play feature of a monitor can't be used with BNC connectors.

Solution
If you're using a standard analog monitor that has an HD-15 connector, use this connector instead of the BNC connectors.
Problem: 3D and video programs don’t work

Cause
Your computer may not have given an IRQ (interrupt request) to your Matrox graphics card or may have given one used by another device in your computer. This may be because your computer’s “Plug-and-Play” feature is turned off.

Windows 2000/XP – To check the display adapter’s IRQ:

1. Click Start -> Settings* -> Control Panel -> Performance and Maintenance* -> System (double-click*) -> Hardware -> Device Manager. (* Depending on your version and configuration of Windows, this part of the step may not be necessary.)

2. Click the plus sign to the left of the Display adapters. An "X" through an icon means the hardware has been disabled. A circled exclamation point through the icon means the hardware has a problem.

3. Double-click the name of your Matrox display adapter to open a properties dialog box. The type of problem is displayed in the General tab -> Device status area. Check also the Resources tab -> Resource type list for an Interrupt Request.

Solution
Change settings in your computer BIOS setup utility.

If your computer has the options of enabling Plug-and-Play detection, or assigning an IRQ to a VGA adapter, make sure they’re enabled. If your computer doesn’t have these options, you may be able to manually assign an IRQ to your graphics card using the BIOS setup utility.

For more information on the BIOS setup utility of your computer, see your system manual or contact your system manufacturer.

Cause
Your computer’s other BIOS settings may be incorrect.

Solution
Reset your computer BIOS settings to the factory defaults using your computer’s built-in BIOS setup utility. The factory defaults are usually the "safest" settings. Check your system manual for more information.
**Problem**

Using multiple displays under Windows 2000/XP, program doesn’t work with main graphics card

**Cause**

Your main graphics card may not be controlling your primary display. The graphics card that controls your primary display is the one that first displays information when you restart your computer.

A program that doesn’t recognize multiple displays may not work with a graphics card unless it’s controlling your primary display.

Your computer BIOS (Basic Input/Output System) and the slot type (PCI or PCIe – see “Choose a PCI slot”, page 4) of each graphics card help determine which graphics card controls your primary display.

**Solution**

If you’re having problems with a program that can be moved on your Windows desktop, run this program on your primary display. Make sure the program window doesn’t overlap any other display. If the program doesn’t work with the graphics card controlling your primary display, or you want your main graphics card to control your primary display, see the other solutions.

**Solution**

Change the configuration of your computer BIOS so that the slot type of your main graphics card has priority for becoming the primary display. For information on how to change your computer BIOS settings, see your system manual.

If your computer BIOS doesn’t let you select which slot type has priority for becoming the primary display, a BIOS update may be available to let you do this. (The BIOS of most computers can be updated with software.) For a possible BIOS update for your computer, contact your system vendor.

**Solution**

If there’s a graphics controller built into the motherboard of your computer, by changing your computer BIOS settings, you may be able to change which device controls your primary display. For more information, see your system manual.

**Solution**

If you don’t need to use the graphics card that’s controlling your primary display, remove it from your computer. If your primary display is controlled by the motherboard of your computer, see your system manual for information on how to disable this graphics controller.

**Cause**

The program you’re using may not work properly with systems using more than one display at a time.

**Solution**

An update may be available for the program you’re using. This update may fix problems this program has with multi-display systems. For more information, contact the software distributor for the program you’re using.
Solution  Windows 2000/XP – For advanced users – To use a program that doesn’t support multi-display systems, you can disable all displays other than your primary display:

1 Double-click the PowerDesk icon ( ) on your Windows taskbar to access the PowerDesk main interface. To see the PowerDesk icon in Windows XP, you may need to click the Show hidden icons button ( ) on your Windows taskbar.

2 Click Multi-Display Setup. Make sure you’re using 1 display.

3 Click Start → Settings* → Control Panel → Performance and Maintenance* → System (double-click*) → Hardware → Device Manager. (* Depending on your version and configuration of Windows, this part of the step may not be necessary.)

4 Click the plus sign to the left of the Display adapters.

5 For each display adapter, except for the one controlling your primary display, right-click the name of a display adapter, then click Disable → Yes.

Note: Your primary display can’t be disabled.

6 Restart your computer for changes to take effect.

Note: To restore display adapters, repeat steps 3–5, but click Enable in step 5.

Problem  Not all graphics cards in the computer are fully supported
(Software doesn’t work with a certain graphics card, or another graphics card doesn’t work at all)

Cause  If you have different models of graphics cards in your computer, your Matrox display driver may not support all the graphics cards in your computer.

Solution  Under Windows 2000/XP, a display driver may support one or more graphics cards. If a display driver doesn’t support a certain card, a different display driver must be used for that card. Software that depends on a certain display driver may not work with a graphics card that’s not using the same display driver.

Note: A Matrox driver package that supports multiple graphics cards may be available. For more information, see the Matrox Web site (www.matrox.com/mga).

Solution  If a graphics card isn’t supported, you may need to remove it. If there’s graphics hardware built into the motherboard of your computer that’s not supported by your software, see your system manual for information on how to disable this graphics hardware.
Problem: In multi-display mode, displays aren't numbered consecutively

Cause: If you have more than one graphics card in your computer, the display numbering may not be consecutive for the displays of a multiple-display card (for example, a DualHead supporting card). Display numbering depends on the types of expansion slots used in your computer (AGP and PCI) and the BIOS settings of your computer.

Solution: Windows* 2000/XP – Move the displays in Windows. (* Only while using multiple displays in independent mode. For more information, see PowerDesk help.)

1. Right-click your Windows desktop background, then click Properties → Settings.
2. Select a display and move it according to the physical position of the monitor it's associated with.

Note: In multi-display mode, you may have limited control over the arrangement of your displays. For more information, see Matrox PowerDesk documentation.

Problem: Screen image defects appear, program doesn't run properly, or Windows doesn't work properly (example: mouse pointer not drawn properly)

Cause: Some programs may not work properly with some Matrox acceleration.

Solution: Disable Windows effects:

Windows 2000 –

1. Right-click your Windows desktop background, then click Properties → Effects.
2. Disable one or more features under Visual effects.

Windows XP –

1. Right-click your Windows desktop background, then click Properties → Appearance → Effects.
2. Disable one or more features.
Solution If possible, update your Matrox display driver. Matrox makes new display drivers available on the Matrox Web site (www.matrox.com/mga).

Note: If your Matrox product was provided by the manufacturer of your computer, check the Web site of that manufacturer for the latest display driver. A display driver provided by the manufacturer of your computer is more likely to be tested with your computer model.

Solution Windows 2000/XP – Disable Matrox hardware acceleration:

1 Right-click your Windows desktop background, then click Properties → Settings → Advanced → Troubleshooting.

2 Move the Hardware acceleration slider to None.

3 Click OK → OK to accept the changes.

Note: If you identify a program that doesn’t work well with Matrox acceleration, please contact Matrox technical support (see page 27) and describe the problem. This information may help us come up with a fix or work-around in a future driver release.

Problem Program window or dialog box doesn’t appear on screen

Cause Another window or dialog box may be covering the window or dialog box you want to see.

Solution Move, close, or minimize any window or dialog box that may be covering the window or dialog box you want to see.

Cause If you’re using multi-display mode, the program window or dialog box may be in a display or on a monitor that’s unusable. (For example, your monitor may not be properly connected or configured.)

Solution Make sure all the displays and monitors you want to use are usable. For more information, see other troubleshooting items in this guide.

Cause The software may be using a display you didn’t intend to use or the software may be configured to use more displays than the actual number of monitors you have. (For example, you may be in DualHead Multi-Display mode but you only have one monitor.)

Solution Disable the display:

Windows 2000/XP * –

(* Only while using multiple displays in independent mode. For more information, see PowerDesk help.)

1 Right-click your Windows desktop background, then click Properties → Settings.
2 Select the display you want to disable, then clear the **Extend my Windows desktop onto this monitor** check box.

**Cause**
The program window or dialog box may be somewhere off-screen.

**Solution**
If the program window you want to see is named on the Windows taskbar, right-click on it and select **Maximize**. (If you click **Restore** the program window goes back to its previous position. To fix this problem, see the other solutions.)

**Solution**
Manually move the program window or dialog box:

1 Press `[Alt]+[Space]`.
2 If you see a pop-up menu, click **Move**. If you don’t see a pop-up menu, press `[M]` (for **Move**).
3 Press on one of the arrow keys once and move your mouse pointer to where you want the window or dialog box to appear, then click. The program window or dialog box should appear where you clicked.

**Solution**
Windows 2000/XP –

1 Double-click the PowerDesk icon on your Windows taskbar to access the PowerDesk main interface. To see the PowerDesk icon in Windows XP, you may need to click the **Show hidden icons** button on your Windows taskbar.

2 Click **Desktop Management**.

3 Enable one or more of the following features:
   - **Center dialog boxes and message boxes**
   - **Open program windows**
   - **Maximize windows**

4 Choose where you want the program window or dialog box to appear.

For more information, see Matrox PowerDesk help.

**Problem**
Display on digital monitor appears blurry or uses only a portion of the screen

**Cause**
You may be using a lower display resolution than what your digital monitor supports. If your monitor supports display scaling, the image on your screen may appear blurry. If display scaling isn’t supported, the display may use only a portion of your screen.
Solution  Select the highest display resolution available. This generally results in better image quality. (While using two digital monitors at the same time, certain limitations may apply. For more information, see page 23.)
Display information

- Your Matrox graphics card is 100% VGA compatible and supports all VESA standards: VBE 2.0 (Super VGA modes), DPMS (energy saving), and DDC-2B (Plug-and-Play monitor).

- Your Matrox product supports DualHead features. DualHead features control 2 displays at a time.

- To get the most of your Matrox product, we recommend using the highest color palette setting (a 32-bit color palette) for all your displays.

- 3D acceleration is only available with a 16- or 32-bit color palette.

- The display resolutions and refresh rates available depend on your Matrox graphics card, display driver, software monitor settings, and monitor. For information on the capabilities of your monitor, see your monitor documentation.

- The highest display resolution supported by your main display is 2560 × 1600 (dual-link only) or 2048 × 2048 (analog, dual-link). The highest display resolution for your secondary display is 1920 × 1200 (analog).

- While using 2 displays at a time, each monitor has its own monitor settings (refresh rates).

- While using 2 displays at a time both at the highest display resolution, certain display limitations may apply. (For example, video playback may be limited.)

- If you’re using BNC connectors with a Plug-and-Play monitor, the Plug-and-Play feature of your monitor can’t be used. To use the Plug-and-Play feature of your monitor, instead of the BNC connectors, use the 15-pin connector at the back of your monitor.

Supported VESA modes (main display)

In the table below, VESA modes supported by your Matrox graphics card are indicated by a VESA mode number. Many Super VGA DOS programs use VESA modes.

<table>

* Compatible with 32-bit, 33 MHz PCI slots, with 3.3V or 5V PCI slots, and with PCI-X slots. While using a PCI-X slot, the clock speed used is 66 MHz.

### Environmental specifications

- Minimum/maximum ambient operating temperatures: 0 to 55 °C
- Minimum/maximum storage temperature: -40 to 75 °C
- Maximum altitude for operation: 3,000 meters
- Maximum altitude for transport: 12,000 meters
- Operating humidity: 20 to 80% relative humidity (non-condensing)
- Storage humidity: 5 to 95% relative humidity (non-condensing)

### Digital monitor information

- TMDS (Transition Minimized Differential Signaling) encoding based on the Silicon Image PanelLink standard
- DDWG (Digital Display Working Group) compliant DVI connector
- EDID (Extended Display Identification Data) 1.2, 1.3 (without the extended data block), and 2.0 support
Maximum card dimensions (PCI)

7.31 in. / 18.57 cm

≤ 0.75 in. / ≤ 1.91 cm

4.2 in. / 10.67 cm

0.325 in / 0.83 cm
Maximum card dimensions (PCIe)

6.4 in. / 16.26 cm

≤ 0.75 in. / ≤ 1.91 cm

0.315 in. / 0.81 cm

4.38 in. / 11.13 cm
Customer support

Matrox Web

Matrox is on the Internet with a World Wide Web (WWW) site. Our Web site has product literature, press releases, technical material, a sales office list, trade show information, and other relevant material.

- E-mail questions or comments regarding the site to webmaster@matrox.com.

If you have a problem

Matrox values your business and offers professional support for your Matrox product. For product support, contact your Matrox representative or do one of the following:

- Visit our technical support Web site at www.matrox.com/graphics/support.
- Visit our technical support forum at www.matrox.com/graphics/support/forum.
- See our FAQs (Frequently Asked Questions) at http://forum.matrox.com/mga/.

Information we need

Please give a complete description of the problem, and include:

- Matrox card serial number, model number, revision number, BIOS number, driver type and version, and memory address at which the Matrox card is installed.
- Computer brand and model name.
- Monitor brand and model name.
- Operating system, version, and service pack.
- Brand and model of any other cards and devices installed on your system.

Program-specific problems

If a problem appears with a specific program, please give us the following information:

- Display settings (color palette, display resolution, and so on) applied when the problem occurs.
- Program name and version. Name any add-on packages you’re using.
Detailed steps known to cause the bug, so we can reproduce it.

---

**Where to get information**

For system information:

- **Windows 2000** – Right-click the *My Computer* icon on your Windows desktop background, then click *Properties*.

- **Windows 2000/XP** – Click *Start* → *Programs* → *Accessories* → *System Tools* → *System Information*.

- **Windows XP** – Click *Start* → *Settings* → *Control Panel* → *Performance and Maintenance* → *System* (double-click*). (* Depending on your configuration of Windows, this part of the step may not be necessary.)
Warranty

A. Limited Warranty Statement

1. Matrox Graphics Inc. (“Matrox”) warrants to the end-user customer, who provides adequate proof of purchase that Matrox hardware products purchased from Matrox authorized dealers will be free from defects in materials and workmanship for a period of one (1) year from the date of purchase. This warranty applies only to the original end-user purchaser and is non-transferable. Conditions and limitations of Matrox’s warranty are stated below.

2. Matrox’s limited warranty covers only those defects which arise as a result of normal use of the hardware and does not apply to any:
   a. improper or inadequate maintenance;
   b. incompatibilities due to the user’s hardware or software applications with or in which the Matrox product interfaces;
   c. product of a special or custom-made nature;
   d. unauthorized modification or misuse;
   e. improper installation, misapplication or negligence;
   f. operation outside the product’s environmental specifications;
   g. improper site preparation or maintenance;
   h. software;
   i. other causes that do not relate to a product defect;
   j. defects or damage suffered as a result of force majeure (including theft);
   k. defects or damage suffered as a result of normal wear and tear; and/or
   l. stolen goods.

3. If Matrox receives, during the applicable warranty period, notice of a defect in a warranted hardware product and the defective Matrox product in question, Matrox shall at its sole option, either repair or replace the product, and shall return the repaired product or a replacement product within a reasonable delay. The replacement product may not be new, provided that it has functionality at least equal to that of the product being replaced.

4. This warranty is valid in any country where Matrox hardware products are distributed by Matrox or its authorized dealers.

5. This Limited Warranty Statement gives the customer specific legal rights. The customer may also have other rights which vary from state to state in the United States, from province to province in Canada, and from country to country elsewhere in the world.

B. Limitations of Warranty

1. NEITHER MATROX NOR ANY OF ITS THIRD PARTY SUPPLIERS MAKES ANY OTHER WARRANTY OF ANY KIND, WHETHER EXPRESSED OR IMPLIED, WITH RESPECT TO MATROX PRODUCTS. MATROX SPECIFICALLY DISCLAIMS (and the customer, by accepting the Matrox product, specifically accepts such disclaimer and waives) ALL OTHER WARRANTIES, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR OR INTENDED PURPOSE OR USE AND THE WARRANTY AGAINST LATENT DEFECTS, WITH RESPECT TO THE HARDWARE AND/OR SOFTWARE. MATROX FURTHER DISCLAIMS ANY WARRANTY THAT MATROX PRODUCTS, IN WHOLE OR IN PART, WILL BE FREE FROM INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY OR PROPRIETARY RIGHTS.

2. To the extent that this Limited Warranty Statement is inconsistent with the law of the locality where the customer purchases the Matrox product, this Limited Warranty Statement shall be deemed modified to be consistent with such local law. Under such local law, certain limitations of this Limited Warranty Statement may not apply to the consumer.

3. To the extent allowed by local law, the remedies provided in this Limited Warranty Statement are the customer’s sole and exclusive remedies.
C. Limitations of Liability

1. EXCEPT FOR THE OBLIGATIONS SPECIFICALLY SET FORTH IN THE LIMITED WARRANTY STATEMENT, IN NO EVENT SHALL MATROX BE LIABLE FOR:
   a. any direct, indirect, special, incidental, consequential, foreseeable or unforeseeable, or punitive damages, whether based on contract, tort, delict or any other legal theory and whether advised of the possibility of such damages; and/or
   b. damages arising from the loss of use, data, production revenue and/or profit of in connection with the Matrox product or any business interruption.

2. Without prejudice to the foregoing, any liability of Matrox for any breach of warranty shall be limited to the amount paid by the customer for the defective hardware in question.

3. To the extent allowed by local law, Matrox’s entire liability and the customer’s exclusive remedy shall be the repair or replacement of any defective product during the warranty period. Matrox does not offer any other warranty with respect to Matrox hardware or software or any other hardware or software.

4. Customer shall be responsible for all applicable taxes, duties and customs fees on any replacement unit, as well as all transport, insurance, storage and other charges incurred on all returned products.

D. Obtaining Service

1. Verify that your Matrox product was installed and configured according to the information in its accompanying documentation.

2. Read the “Troubleshooting” information included with your Matrox product and the documentation provided by your dealer to see if you can solve the problem yourself.

3. If you are still experiencing difficulties, please contact your dealer where you purchased your Matrox product.

E. General

This limited warranty shall be governed by the laws of the Province of Quebec, Canada and the federal laws of Canada applicable therein and the courts of the Province of Quebec shall have exclusive jurisdiction to hear and decide any dispute instituted by the customer in connection with this limited warranty; the customer waives, by accepting the product, its rights to institute proceedings in connection with this warranty against Matrox in any jurisdiction other than Quebec.
Software license agreement

Single User Products  This Matrox software (the “Software”) is copyrighted by Matrox Graphics Inc. All rights are reserved. The purchaser is granted a license to use the software only, subject to the following restrictions and limitations:

1. The license is for the original purchaser only, and is not transferable without written permission of Matrox.
2. The original purchaser may use the Software on a single computer owned or leased by the original purchaser. You may not use the Software on more than a single computer, even if you own or lease more than one computer, without written consent of Matrox.
3. The original purchaser may make back-up copies of the Software for his or her own use only, subject to the use limitations of this license.
4. The original purchaser may not engage in, nor permit third parties to engage in, any of the following:
   - Providing or disclosing the Software to third parties.
   - Providing use of the Software in a computer service business, network, time-sharing, multiple CPU or multi-user arrangement to users who are not individually licensed by Matrox.
   - Making alterations or copies of any kind in the Software (except as specifically permitted above).
   - Attempting to unassemble, de-compile or reverse engineer the Software in any way.
   - Granting sublicenses, leases, or other rights in the Software to others.
   - Making copies, or verbal or media translations, of the user’s guide.
   - Making telecommunication data transmissions of the Software.

Matrox reserves the right to terminate this license if there is a violation of its term or default by the Original Purchaser. Upon termination, for any reason, all copies of the Software must be immediately returned to Matrox, and the Original Purchaser shall be liable to Matrox for any and all damages suffered as a result of the violation or default.

Limited warranty  Matrox warrants to you, for a period of 90 days normal use from your date of purchase, that:

1. The CD/disks on which the software is furnished and the documentation are not defective.
2. The Software is properly recorded upon the CD/disks included.
3. The documentation is substantially complete and contains all the information Matrox deems necessary to use the software.
4. The Software functions substantially as described in the documentation.

Matrox’s entire liability and your exclusive remedy shall be the replacement of any CD/Disks or documentation not meeting these warranties, which is returned to Matrox or an authorized dealer, together with a copy of your paid receipt. The above is the only warranty of any kind, either express or implied, including, but not limited to the implied warranties of merchantability and fitness for a particular use that is made by Matrox on this Licensed Software. In no event shall Matrox be liable to you or to any third party for consequential, special, indirect or incidental damages which you may incur as a result of using the licensed software, including, but not limited to, loss of data, or information of any kind which you may experience.

### USA

**FCC Compliance Statement**

Remark for the Matrox hardware products supported by this guide  This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: • Reorient or relocate the receiving antenna • Increase the separation between the equipment and receiver • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected • Consult the dealer or an experienced radio/TV technician for help.

**WARNING** Changes or modifications to this unit not expressly approved by the party responsible for the compliance could void the user's authority to operate this equipment. The use of shielded cables for connection of the monitor to the card is required to meet FCC requirements.

**Declaration of conformity of a Class B digital device according to the FCC rules**

We, the Responsible Party  Matrox, 625 State Route 3, Unit B, Plattsburg, NY 12901 • Telephone: (514) 822-6000 (extension 2026) • Attention: Conformity Group Matrox

Declaration  The Matrox hardware products supported by this guide comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) these devices may not cause harmful interference, and (2) these devices must accept any interference received, including interference that may cause undesired operation. Any question regarding this declaration should be forwarded to the above coordinates.

### CANADA

**(English) Industry Canada Compliance Statement**

Remark for the Matrox hardware products supported by this guide  These digital devices do not exceed the Class B limits for radio noise emission from digital devices set out in the Radio Interference Regulation of Industry Canada.

**(Français) Conformité avec les exigences du ministère de l'Industrie Canada**

Remarque sur les produits matériels Matrox couverts par ce guide  Ces appareils numériques n'émettent aucun bruit radioélectrique dépassant les limites applicables aux appareils numériques de Classe B prescrites dans le Règlement sur le brouillage radioélectrique édicté par Industrie Canada.

### JAPAN

**VCCI Compliance Statement**

Remark for the Matrox hardware products supported by this guide  This is a Class B product based on the standard of the Voluntary Control Council for Interference from Information Technology Equipment (VCCI). If this is used near a radio or television receiver in a domestic environment, it may cause radio interference. Install and use the equipment according to the instruction manual.

この装置は、情報処理装置等電波障害自主規制協議会（V C C I）の基準に基づくクラスB情報技術装置です。この装置は、家庭環境で使用することを目的としていますが、この装置がラジオやテレビジョン受信機に近接して使用されると、受信障害を引き起こすことがあります。

取扱説明書に従って正しい取り扱いをして下さい。
Remark for the Matrox hardware products supported by this guide

These devices comply with EC Directive 89/336/EEC for a Class B digital device. They have been tested and found to comply with EN55022/CISPR22 and EN55024/CISPR24. In a domestic environment these products may cause radio interference in which case the user may be required to take adequate measures. To meet EC requirements, shielded cables must be used to connect the monitor and other peripherals to the card. These products have been tested in a typical class B compliant host system. It is assumed that these products will also achieve compliance in any class B compliant system.
